

H&P Saves Operator 9+ days

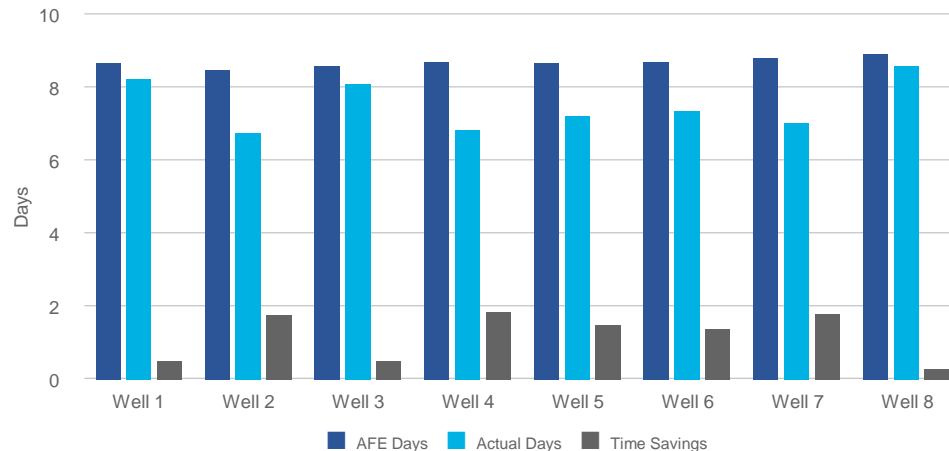

- ▶ First pad drilled for a new customer on an 8-well program
- ▶ Ended the well program at 9.36 days under the operator's AFE
- ▶ Saved the equivalent total time of one well

Working together to deliver better drilling outcomes

- ▶ **Planning and Preparation**
Meticulously organized strategies focused on achieving the operator's performance goals
- ▶ **Field-Proven Technology**
H&P's FlexFusion technology package enhanced consistency and reduced flat time
- ▶ **Seamless Collaboration**
Customer, rig crews, on-site leadership and remote support teams openly discussed best practices, lessons learned, and recommendations to help ensure optimal performance
- ▶ **Continuous Communication**
Ongoing feedback loop between all parties throughout the entire operation

Comparison of AFE vs. Actual by Well
