

Not All Rigs Are Created Equal.

The newest FlexRig® fleet design, **Flex3W Arabia**, offers configurations to deliver more power, more finesse, and greater mobility to match the unique demands of Middle East operations.

- Walking capability of 500 ft (152.40 m) in a straight line, or multiple rows within a 415 x 75 ft (126.5 x 22.86 m) box
- Achieve 100 ft (30.48 m) per hour in walking speed without having to move the backyard
- Uniform rig design, intentionally developed to top-tier environmental stewardship, safety, and performance standards

NO MORE...

- **Excessive rig move loads:** rig down and rig up is made easier with the condensed box-on-box substructure
- **Disconnecting hard lines during rig moves:** keep existing connections through the use of flexible flowlines
- **Breaking electrical connections during walks:** the patented H&P BoomBox allows the rig to stay energized continuously
- **Crane usage to move the rig's backyard skids:** reduce dropped object exposure while transporting engines, mud pumps, and mud tanks
- **Removing the block and top drive:** integration enables this equipment to be raised and lowered hydraulically on the mast

FLEX3 WALKING RIG

FLEX3 SKIDDING RIG

Standard rig floor height- 25.5 ft. (rotary beam clearance of 21') option of 30.5' (rotary beam clearance of 26')

- Well head clearances of 10' standard (option of 15')
- Offline BOP testing capabilities.

H&P Patent Pending Utility Boom System (UBS)

- Provides continuous utility service to the walking structure while leaving the backyard systems in place for the duration of the pad.

H&P Mud System (patented by H&P in 1998)

- 2000+bbls of active capacity // 2000bbls of reserve system capacity
- Eliminate the need to have workforce inside confined space

FlexApps and New Technology

- Internal teams including Advanced Well Engineering and Outcome partners help solve challenges on the rigs and fit-for-duty technologies to customers.

Safety And Efficiency By Design

Who Is Helmerich & Payne?

One of the largest and longest operating onshore drilling and technology companies in the world, known for our signature FlexRig® fleet, unmatched efficiency gains, and uncompromising commitment to **SAFETY** and **SUSTAINABILITY**.

Safety & Sustainability

- Scalability
- Experienced & dedicated workforce
- Industry-leading processes

Drilling Execution

- Efficiency
- Mobility
- Technology

Global Legacy

- 100+ years
- 65+ years working in over 30 countries
- 25,000+ wells drilled in past 10 years
